Goggles – Classic Styles and Modern Materials

Our range of goggles has been carefully chosen to complement the classic shapes and designs of our helmets. Davida are committed to the manufacture of high quality products using traditional methods, materials and styles. The range of goggles that we supply to complement our helmets are selected with the same criteria in mind.

code **65**

Climax have been manufacturing goggles in Spain since the end of the Second World War. The Climax 500 model was especially designed in the 1960's for the motorcyclist as an alternative to the very popular Octopus goggle used extensively by racers during the 1950's and 60's.

- Chrome plated metal frames.
- Triplex curved glass lens. Except 521 which is split lens.
- Non adjustable nose bridge.
- One piece foam padded black leather eye pads.
- Adjustable headband made of rustproof springs inside soft nylon sleeve.

Climax 500

65500 Climax 500

Pear shaped frame and curved lens providing wide peripheral vision. Black Leather foam filled padded mask.

Climax 521

65521 Climax 521

Designed for use over spectacle frames, using thicker foam padding and an additional plastic section between the frames and black leather face mask. Split triplex glass lens provide a wide peripheral vision.

Climax 510

65510 Climax 510

Square shaped frames and curved triplex glass lens. Foam filled padded face mask in black leather. Interior face mask across nose bridge has a cut away section to provide gap for small framed spectacles to prevent focal distortion and pressure points.
